INTRODUCTION

12821A LANCE, Missile Number 4819, Round Number 335NCL, was launched from LC-33, White Sands Missile Range (WSMR), New Mexico, at 1500-MDT, 13 August 1979. The scheduled launch time was 1500 MDT.

DISCUSSION

Meteorological data were recorded and reduced by the White Sands Meteorological Team, Atmospheric Sciences Laboratory (ASL), White Sands Missile Range, New Mexico. The data were obtained by the following methods:

1. Observations

a. Surface

(1) Standard surface observations to include pressure, temperature ($^{\circ}\text{C}$), relative humidity, dew point ($^{\circ}\text{C}$), density (gm/m^3), wind direction and speed, and cloud cover were made at the EC-30 Met Site at T-0 minutes.

(2) Anemometer data were provided from existing pole-mounted and tower-mounted anemometers at LC-33. Monitor of wind speed and direction from one anemometer was also provided in the launch control room.

b. Upper Air

(1) Low level wind data were obtained from Single Theodolite pibal observation at:

SITE AND ALTITUDE

Holloman AFB 1450 MDT 2190 Meters
Holloman AFB 1500 MDT 3660 Meters

(2) Air structure data (rawinsonde) were collected at the following Met Sites. Data were collected from surface to as high as possible feet in 500-feet increments.

SITE AND TIME

Holloman 1350 MST
Jallen 1350 MST
